System Requirements:

After loading the game.exe file and making a change to the file name, there are about 45 other files that need to be changed. We have worked out a batch script to do all of this, but since it has to change a ton of files to do so. Before executing this file, you will need to make the changes to all of the files. This guide is meant to be helpful to the community and has been put together by some of the best players in the community, therefore may not be as accurate as others guides that are out there.
